

Study Plan: Learn Python Basics in 7 Days

Step 1: Set up Python and VS Code.

Step 2: Learn variables, data types, and operators.

Step 3: Practice if/else and loops with small exercises.

Step 4: Learn functions and modules.

Step 5: Practice lists, dictionaries, and sets.

Step 6: Build a mini project (CLI to-do app).

Step 7: Review mistakes and revise key concepts.
